

Soft Skill HR Assignment

1. Tell me something about yourself in brief:

Ans. Myself Sahil Ahuja and I have done my BCA from Parul university & I have done python internship from Spectrics solution company which is located in Ahmedabad & I have HTML, CSS and JavaScript skills & interest in coding.

2. How quickly do you adapt to new technology?

Ans. I adapt to new technology very quickly. I enjoy learning and exploring new tools and platforms, and I make it a priority to stay updated with the latest trends in my field. My technical background helps me pick up new skills efficiently and apply them effectively in my work.

3. What is your ideal company or workplace?

Ans. My ideal company is one that fosters innovation, values creativity, and supports continuous learning and growth. I thrive in environments where collaboration is encouraged, ideas are welcomed, and there's a strong focus on professional development. A positive and inclusive culture is also important to me, as it helps

create a supportive and motivating atmosphere where everyone can contribute their best work.

4. What is the difference between hard work and smart work?

Ans. Hard work involves putting in a lot of effort, time, and persistence to achieve a goal, often focusing on quantity and endurance. Smart work, on the other hand, is about being efficient and strategic—finding the most effective ways to achieve the same or better results with less effort. Smart work often involves planning, using the right tools, and prioritizing tasks to work more efficiently. In essence, hard work is about working harder, while smart work is about working smarter.

5. What did you do in the last year to improve your knowledge?

Ans. In the last year, I focused on enhancing my skills in web design by taking online courses in advanced HTML, CSS, and JavaScript. I also worked on several personal projects to apply what I learned in real-world scenarios. Additionally, I stayed updated with industry trends by reading articles, following design blogs, and participating in webinars. These efforts helped me sharpen my skills and stay current in a rapidly evolving field.

6. How do you feel about working weekends and night shifts?

Ans. I don't have any problem to work at night in weekend because I am a fresher, my first priority to gain More knowledge and experience, because I think company growth is directly related to employee growth, if it is necessary to work in night, I will with my company in any situation.

7. What is your greatest fear?

Ans. The biggest fear in my life is the fear of failure. I'm afraid of not achieving my goals, letting down myself or others, and missing out on opportunities for success and fulfilment. However, I believe that facing this fear head-on, learning from setbacks, and persevering through challenges ultimately leads to personal growth and resilience.

8. You have not done your PG yet. This is not a drawback, but don't you think you should get a PG degree asap?

Ans. While I recognize the value of a postgraduate degree, I believe that gaining practical experience and building a strong portfolio are equally important at this stage of my career. I'm focused on developing my skills through hands-on projects and real-world challenges. That said, I'm open to pursuing a PG degree in the future if it aligns with my career goals and helps me advance in my field.

9. Describe who you are? or tell me about your background.

Ans. I'm a web designer with a background in creating engaging and user-centric digital experiences. I specialize in HTML, CSS, and JavaScript, and I've worked on various projects, including a smart restaurant management system. My passion lies in combining creativity with technology to build functional and aesthetically pleasing websites. I'm committed to continuous learning and staying current with industry trends to deliver high-quality work.

10. What are your strong points? or What are your strengths?

Ans. My strengths include:

1. Technical Skills: Proficiency in HTML, CSS, and JavaScript, allowing me to build and enhance websites effectively.
2. Creativity: Ability to design visually appealing and user-friendly interfaces that meet project goals and user needs.
3. Adaptability: Quick to learn and apply new technologies and techniques to stay ahead in a constantly evolving field.
